

VASCULAR SCREENING PACKAGE

NON-
INVASIVE
TESTS

Restoring Rhythm of Life

Stay ahead of heart disease! Our vascular screening packages are designed to identify vascular issues before they become serious concerns.

If the answer is 'YES' to any of the above, you may be at risk of...

- **Peripheral artery disease (PAD):** Narrowing of the arteries that restricts blood flow to the limb.
- **Abdominal Aortic Aneurysm (AAA):** A bulge in the wall of an artery, which can rupture and cause life-threatening bleeding.
- **Carotid Artery Disease:** Narrowing of the arteries in the neck, increasing the risk of stroke.
- **Varicose Veins:** Swollen, twisted veins that often appear blue or dark purple, typically in the legs. They occur when the valves in the veins fail to function properly, leading to blood pooling and increased pressure. Varicose veins can lead to more serious conditions such as Chronic Venous Insufficiency (CVI) and Deep Vein Thrombosis (DVT) if left untreated.

Whether you're at risk or simply want peace of mind, our Vascular Screening Package is tailored to your unique needs.

Terms & Conditions

- Available only to individuals who are independently mobile.
- Valid only with Northern Heart Hospital Vascular Screening Package. Any optional test(s) are upon request and will be charged separately.
- Any follow-up investigation, treatment, or medication as a result of this screening will be charged by cash, debit, or credit cards.
- Results will be reported by Northern Heart Hospital's consultant vascular surgeon.
- Appointments must be made at least two (2) business days in advance and are subject to availability.
- Not valid in conjunction with other promotions or discounts.
- Not applicable with insurance/corporate guarantee letters.
- The decision made by Northern Heart Hospital is final and non-negotiable.
- Northern Heart reserves the right to refuse any requests without giving reasons, change the terms and conditions, or cancel any promotions at any time without notice.

VASCULAR SCREENING PACKAGE

Vascular Arterial Wellness RM 998

- Ultrasound Carotid Artery
- Ultrasound Abdominal Aorta
- Ankle Brachial Pressure Index (ABPI)

Vascular Arterial & Venous Wellness RM 1,398

- Ultrasound Carotid Artery
- Ultrasound Abdominal Aorta
- Ultrasound Lower Limb Vein
- Ankle Brachial Pressure Index (ABPI)

Our Non-invasive Procedures for Vascular Screening

Ultrasound Carotid Artery

An imaging test to evaluate blood flow in the carotid arteries and check for blockages or narrowing.

Ultrasound Abdominal Aorta

A test that uses sound waves to assess the abdominal aorta for aneurysms or other abnormalities.

Ultrasound Lower Limb Vein

A diagnostic tool used to assess venous insufficiency in the lower limbs.

Ankle Brachial Pressure Index (ABPI)

A simple test to measure blood flow and detect peripheral artery disease in the legs.

All you need to know before screening:

Available Monday to Friday (afternoon) – review on same day/ other day

Walk-In or by appointment

Fasting not required

May continue taking regular medications

Patients with open wounds must first undergo a clinic review for an initial assessment before screening
